

CREATIVE PURSUITS: THE MUSIC ROOM

The Music Room

Research shows us that creativity stimulates young people to think and learn well. MYST has created an amazing soundproof music rehearsal space within our Katoomba Youth Centre. Local young bands and performers can access this space for free and use it as a rehearsal space, in order to help them develop their craft and pursue a career in music.

Complete with drum kit, bass guitar and all the essential equipment, the MYST Music Room promotes creativity and self-expression by providing a dedicated and safe space for young people to explore their creativity through various musical instruments and equipment. The Music Room offers opportunities for young people to develop their musical abilities by practising playing instruments, singing, and experimenting with different styles of music.

Building their confidence and self-esteem, young people are performing and sharing their musical creations in a supportive environment, thereby harnessing the talent of young musicians.

When used as a group space, our Music Room encourages young people to work together, listen to, collaborate with, and learn from one another, fostering important social and interpersonal skills.

The MYST Music Room is a safe haven, offering an alternative to engaging in risky or negative behaviours by providing the opportunity for young people to engage in a constructive, creative and productive activity.

A creative space that allows young musicians to explore, develop, and express their musical abilities, fostering creativity, skill development, confidence, and a lifelong love for music.

Go to the website (<https://myst.com.au/music-room/>) and complete the registration form. You will be contacted by a MYST Staff member within 7 days regarding the next steps.

This space was established with the help of Blue Mountains City Council, Local Blue Mountains Rotary Clubs, Katoomba Music and Future State Studios.
